Dear Cristina:

In follow up to Tad's and your conversation earlier this week, regarding 1-hour SO2 modeling of the H.A. Wagner Generating Plant in Maryland, please see the attached MDE cover letter, Raven Power modeling report, and MDE comments on the Sierra Club modeling. We have uploaded the Raven Power modeling files to the MDE FTP site for your access.

Please see the information below this email on how to access the files from our FTP site. In follow up to the conversation between Jeet and Tim a little while ago, we would be most appreciative if Tim would let us know as soon as he has downloaded the modeling files.

Thank you.

Regards,
Molla

Downloading a file from the MDE FTP Server

1. Open Internet Explorer, enter the link ftp://ftp.mde.state.md.us in the address box, and press the "Enter" key.

2. An Internet Explorer login box should appear. Enter the following credentials into the appropriate places in the login box:

Login ID: mdeftpuser
Password: An3wday!

3. Upon successfully logging into the server, you should see a page with the following statements:

"FTP root at ftp.mde.state.md.us"

"To view this FTP site in Windows Explorer: press Alt, click View, and then click Open FTP Site in Windows Explorer"
"Logged on"

You will not see any further information, including the names of any of the files or folders currently residing in the MDE FTP server. This is normal and the site is functioning as designed.

4. In the Internet Explorer "Menu Bar", click on "File," then "Open . . ." A dialog box titled, "Open" will appear.

5. Within the white space next to "Open," enter the following:
ftp://ftp.mde.state.md.us/<filename>

where <filename> is <Wagner_RavenP_sendfiles_archive.zip>, which is the exact full name of the file needed to be downloaded. Do not include the brackets at the beginning and end of the file's name when entering this into the whitespace next to "Open."

6. Depending on the type of file being accessed, you may see either of the following:

a. Windows Internet Explorer Box stating "What do you want to do with <filename>?"
b. The file already displayed within in the Internet Explorer

7. To download the file being accessed from the MDE FTP server, perform one of the following actions, depending on the action noted in the paragraph above:

a. Windows Internet Explorer Box - click on either "Save" to save the file to the default location on your workstation, or "Save As" to save the file to a specified location of your workstation.
b. File already displayed within in the Internet Explorer - On the Internet Explorer "Menu Bar", click on "File," then "Save as . . ." " to save the file to a specified location of your workstation.

8. After downloading the file onto your workstation, go to the "menu Bar" on Internet Explorer, click "File," then "Exit." Internet Explorer is now closed and you are logged off the MDE FTP server.
